

FOR BUSINESS, LEISURE
AND THE ENVIRONMENT

As London's second largest managed ground transport provider and the UK's largest fleet of zero-emission fuel-cell electric vehicles and the second largest fleet in London, Green Tomato Cars continues to lead the way within London's private hire industry; by using our ultra-low and zero-emission vehicles, UK TV & Film communities can help improve air quality within the capital and tackle climate change, one journey at a time.

Green Tomato Cars' standard vehicle has an emissions rating of 70g/km. By comparison, traditional black taxis have a rating of around 209g/km. In addition, Green Tomato Cars double-offsets unavoidable vehicle emissions through projects that have environmental and well-being benefits to local communities.
